

Proposed Action

Whether to move forward with the development of the Appalachian Hydrogen Hub as proposed by Battelle, in the Appalachian region that includes Ohio, Pennsylvania, and West Virginia

Purpose and Need

Complying with Bipartisan Infrastructure Law (BIL) to catalyze investment in the production, processing, delivery, storage, & end-use of clean hydrogen

Fulfilling DOE goals of accelerating the deployment of clean hydrogen technologies

Creating opportunities for residents to have skilled training and employment

Being one of at least two hydrogen hubs with greatest natural gas resources
